SELECT State, Gender, SUM(SALESTHISYEAR) as "Total Sales This Year"
FROM CUSTOMER7489
WHERE Rating in (1, 2, 3)
GROUP BY State, Gender
ORDER BY State ASC, Gender ASC;
```

Execute Clear

SELECT State, Gender, SUM(SALESTHISYEAR) as "Total Sales This Year" FROM CUSTOMER7489 WHERE Rating in (1, 2, 3) GROUP BY State, Gender ORDER BY State ASC, Gender ASC

STATE	GENDER	Total Sales This Year
New South Wales	F	899
New South Wales	M	3386
South Australia	F	2430
Tasmania	F	1312
Tasmania	M	229
Victoria	F	6695
Victoria	M	7001
Western Australia	F	11247
Western Australia	M	3169

OK. 9 rows selected.

Overall, female customers tend to contribute higher sales numbers than male customers, particularly in Western Australia, where female sales (11,247) undoutably exceed those of males (3,169). Similarly, in South Australia and Tasmania, female customers contribute more significantly to total sales. In contrast, Victoria presents a more balanced pattern, with male customers (7,001) slightly outperforming females (6,695). Therefore my conclusion is that gender plays a notable role in sales distribution, and that female customers may represent a more profitable market segment in several places like Western Australia.
