

INF10025 Data Management and Analytics

Tutorial 3 – Discussion Questions for Week 3

Parameters

- In the context of Access Queries, what is a Parameter?
- Can a Parameter Name contain spaces?
- What is the relationship between the Parameter name and the prompt shown to end users when the query is executed?
- Assume that the text within square brackets below are query parameters

Field:	Invoice Date
Table:	Contacts
Sort:	
Show:	☒
Criteria:	Between [Type the beginning date:] And [Type the ending date:]
or:	

What will happen when this query is executed?

Update Queries

True or False

- An update query may update multiple records within a single table in a single update query?
- An update query may update multiple fields in a single update query?
- An update query may use Parameters?
- An update query may also delete records?

Update Queries

- When executed, what will this query do?

Field:	TMDB_SCORE	RATINGCODE	RELYEAR
Table:	MOVIE	MOVIE	MOVIE
Update To:	6.5		
Criteria:		"PG"	<1980
or:			

- The above query has been executed. However, incorrect criteria were specified. What is the easiest way to reverse this update?
- When executed, what will this query do?

Field:	TMDB_SCORE	RATINGCODE	RELYEAR
Table:	MOVIE	MOVIE	MOVIE
Update To:	[tmdb_score]+1		
Criteria:		"PG"	<1980
or:			

- Could such a query be reversed?

Delete Queries

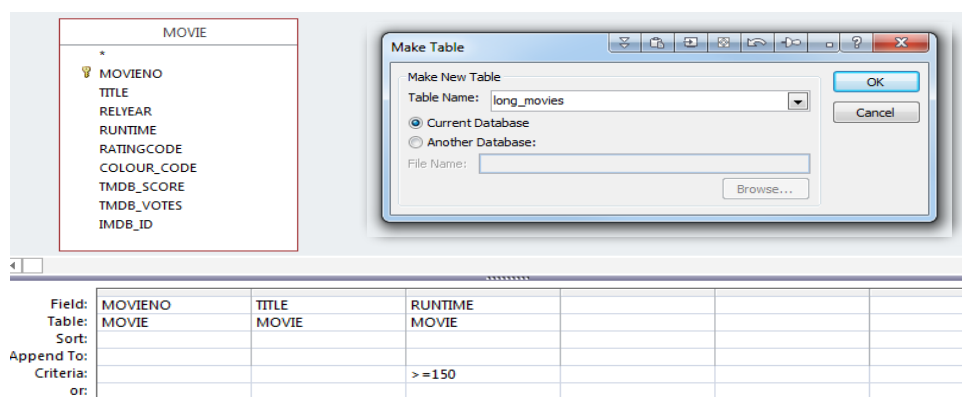

Each of the following is the Query Design grid for a DELETE query.

In each case indicate if any records will be deleted.

- a.
- | | |
|-----------|------------|
| Field: | TMDB_SCORE |
| Table: | MOVIE |
| Delete: | Where |
| Criteria: | |
| or: | |
- b.
- | | |
|-----------|------------|
| Field: | TMDB_SCORE |
| Table: | MOVIE |
| Delete: | Where |
| Criteria: | True |
| or: | |
- c.
- | | |
|-----------|------------|
| Field: | TMDB_SCORE |
| Table: | MOVIE |
| Delete: | Where |
| Criteria: | False |
| or: | |
- d.
- | | | |
|-----------|---------|------------|
| Field: | RUNTIME | RATINGCODE |
| Table: | MOVIE | MOVIE |
| Delete: | Where | Where |
| Criteria: | <90 | "MA" |
| or: | | |

Make Table Queries

- a) The following is the Query Design grids for an MAKE TABLE query. Describe what the query does when executed.

Imagine that you have a table named **Sales** with data that is regularly updated.

- b) If you make a copy of the table and call it **SalesCopy**, how long will it take for that data to be 'out of date' or 'no longer reliable'?

- c) One of purchases in the Sales table was entered incorrectly. The customer id was entered as 113 instead of 131. The problem is rectified by adjusting the appropriate row. Can you see any potential data integrity problems in the database?
- d) If you make a query called **SalesQueryFemale** based on the **Sales** table that selects all purchases made by females, how long will it take for that data to be 'out of date' or 'no longer reliable'?

CrossTab Query

Describe the purpose and output generated by this CrossTab query?

Field:	RELYEAR	COLOUR_CODE	MOVIENO
Table:	MOVIE	MOVIE	MOVIE
Total:	Group By	Group By	Count
Crosstab:	Row Heading	Column Heading	Value
Sort:			
Criteria:			
or:			

SQL

- a) What is SQL?
- b) What has SQL got to do with an Access Select Query?

Importing Data

- a) What is a CSV file?
- b) What is a delimiter?
- c) What is a Text Qualifier?
- d) What would happen if you renamed a file from MYDATA.CSV to MYDATA.TXT?
- e) What application opens if you double click on a .CSV file? Why?
- f) Consider this data in a file that holds name, gender, payment amount phone and address information

Name/Gender/Payment/Phone/Address

"Fred Bloggs"/"M"/230.00/"0493 900800"/"1 Red Rd, Hawthorn, 3122"

"Sue Davies"/ "F"/0/"0487 711811"/"2 Blue St, Richmond, 3121"

"Emma Peel"/"M"/154.50/"4888 344544"/"3 Brown Grove, Box Hill, 3128"

- What character is used as the delimiter?
- What character is used as the text qualifier?

- g) The data file has been altered. No text qualifier has been used. The delimiter has been changed to a comma.

Name,Gender,Payment,Phone,Address

Fred Bloggs,M,230.00,0493 900800,1 Red Rd, Hawthorn, 3122

Sue Davies, F,0,0487 711811,2 Blue St, Richmond, 3121

Emma Peel,M,154.50,4888 344544,3 Brown Grove, Box Hill, 3128

- Can you see a problem when trying to import this data?

Continue with completing submission Tasks 3 for Week 3.
